Hindi
Gujarati

INTERESTS.

Football
Basketball
Horse Riding

PROFILE.

My name is Jugal Gajjar, an Industrial Design student based in Ahmedabad, India. I believe that design helps our imagination to become a part of our tangible world, by the means of research and developing upon our reaction to stimuli. I believe when designing for the people we need to create a connection between them and the product by emotions and empathy. I think that design is a tool to simplify life but it should not help in de-evolution of humans.
